## Solar system word search online

Download / Print Puzzle Report a bug Description Find all the planets of our solar system hidden in this word search, plus and few stars and of course Pluto Learning the names of planets will be a whole lot easier with these free printable Solar System Word Search Puzzles. And once they master the names they can also solve the solar system worksheets with ease! \*this post contains affiliate links\* I've made a few different variations of these so your kids won't easily be fed up with them. Let's search the words! Get Free Printable Solar System Word Search Puzzles. Let's see if we can find the Sun, Mercury, Venus, Earth, Moon, Mars, Jupiter, Saturn, Uranus and Neptun! The first pack of printables has 5 different word search puzzles where kids search for these basic solar system objects. The next pack also has 5 puzzles and it includes all the words the previous one does (so all the planets and moon and the sun) plus there are also other objects that are found in our solar system (not all as there are a whole lot of them) - asteroids, meteoroids, comets, dust, satellites... All in all lots of fun! I really hope your kids will enjoy these and that their interest in space will only become stronger as it really is magnificent - I catch myself sometimes just looking at the stars and thinking about all the wonders space has to offer. Get these free printable Solar System Word Search Puzzles here. More Word Search Puzzles I am a sucker for these puzzles (on paper and computer) - I think they are great for keeping the brains sharp so I do love making them - if you're a fan too be sure to check the Halloween puzzles and summer puzzles amongst other ones. Contact Arkadium, the provider of these gamesTired of broken pencils, smudged eraser marks, and scribbles all over your word search puzzles? Fret not! In Daily Word Search, your computer becomes the pencil AND the eraser. Solve puzzles daily and see your word search skills improve! Download / Print Puzzle Report a bug Description HOME GAMES SOLAR SYSTEM SOLAR SYSTEM WORD SEARCH SOLAR SYSTEM GAME Word Search game with words related to ocean, desert, arctic, rain, forest, freshwater Become a space whiz with our solar system facts. Read on to learn all about our solar system.People Used to Think That Stars WanderedPeople used to think that planets were wandering stars before astronomers had telescopes to look through the sky.Galileo Used the First TelescopeGalileo Galilei was the first astronomer to use a telescope to look at another planet.What Is a Solar System?Our solar system is made up of one star, planets, comets, moons and asteroids. The sun contains 99.8 percent of the mass of the solar system.Asteroids Are Left Over From the Solar System's BirthThe Sun and its planets formed about 4.5 billion years ago from a cloud of dust and gas that slowly condensed. Asteroids and comets are often called the "leftovers" of the planets' birth.Asteroids Are Hitting the Earth More Than EverAsteroids are falling from the skies more often than before, according to a study in the journal Science. Jupiter's Size Eclipses All of the Other PlanetsThe last 5 facts about the solar system revolve around the planets. Let's start with the king of the solar system. Out of all the 8 planets in the solar system, Jupiter is the most massive, weighing in at two and a half times the mass of all the other planets put together. It's known as one of the solar system's four "gas giants" along with Neptune, Saturn and Uranus.Jupiter's Many MoonsOne of the most fascinating solar system Jupiter facts is that it has 67 moons. 17 are awaiting discovery confirmation; 50 are known moons.Planets With RingsJupiter, Neptune, Saturn and Uranus are the only planets that we are aware of that have rings.Saturn Gets a Close-upThe Cassini spacecraft orbited Saturn for more than 13 years to capture some of the most stunning pictures of our solar system ever taken. This mission also collected some other important info on solar system, such as how long it takes to travel from Earth to Saturn — almost 7 years.Other Dwarf Planets May ExistThe solar system's five dwarf planets are Pluto, Haumea, Ceres, Makemake and Eris. The outer regions of the solar system contain one or maybe two additional dwarf planets. MORE FROM QUESTIONSANSWERED.NET A vast expanse with seemingly no end. Have you ever been to the edge of space? While we can blast you off into orbit on a space rocket, we can entice you to explore space in this vega good space-themed Word Search Battle. How far do you want to venture into space? Stay grounded or head into the stratosphere and go gravity-free in this cosmic online puzzle that can be played online and downloaded as a printable to take with you on your own space travels. Head for the stars and generate a new space word search over and over again as you mimosas past mars, Jupiter, and Saturn before returning to earth! Is your space knowledge on par with NASA, or are you more earth-ling and prefer to keep your feet on terra Firma? See if you can comet and qualify for space travel by choosing one of our word search difficulty levels; Blast off with an easy word search with up to 5 words Asteroid further into space with a medium difficulty word search with up to 13 words Makemake history with our hard word search that has up to 23 words. Aim for the moon and play amongst the stars as you orbit the solar system and bring together the universe by playing this space word search battle with other astronauts to see who is worthy of being mission control and who is left behind. Whether you play online or as a printable puzzle, you can be sure to love this space-themed word search. Score: 0% Rank: Correct Answer: Start Quiz >> the envelope of gases surrounding the earth or another planet. Atmosphere a large planet of relatively low density consisting predominantly of hydrogen and helium, such as Jupiter, Saturn, Uranus, or Neptune. Gas Giant the force that attracts a body toward the center of the earth, or toward any other physical body having mass. Gravity a planet whose orbit lies within the asteroid belt, i.e., Mercury, Venus, Earth, or Mars. Inner planet the curved path of a celestial object or spacecraft around a star, planet, or moon, especially a periodic elliptical revolution. Orbit a planet whose orbit lies outside the asteroid belt, i.e., Jupiter, Saturn, Uranus, or Neptune. outer planet a celestial body moving in an elliptical orbit around a star. Planets planet is a planet that is composed primarily of silicate rocks or metals. Rocky Planets the collection of eight planets and their moons in orbit around the sun, together with smaller bodies in the form of asteroids, meteoroids, and comets. Solar System the time taken by a planet to make one revolution around the sun. year is a dwarf planet in the Kuiper belt, a ring of bodies beyond Neptune. Pluto The Great Red Spot is a giant, spinning storm in Jupiter's atmosphere. Great Red Spot a celestial object consisting of a nucleus of ice and dust and, when near the sun, a "tail" of gas and dust particles pointing away from the sun Comet noun: meteor; plural noun: meteors a small body of matter from outer space that enters the earth's atmosphere, becoming incandescent as a result of friction and appearing as a streak of light Meteor a small rocky body orbiting the sun. Asteroid a small body moving in the solar system that would become a meteor if it entered the earth's atmosphere. Meteoroid a celestial body resembling a small planet but lacking certain technical criteria that are required for it to be classed as such. Dwarf Planet
